## A powerful supplement with a unique calming formula for both dogs and cats

This calming supplement for pets uses four effective ingredients to address everyday stress, promote relaxation, and support cognitive function. Hydrolyzed vegetable flavoring is suitable for pets with food sensitivities. Available in multiple strengths to accommodate pets of all sizes and weight ranges.

### ABOUT THE INGREDIENTS:

- ▶ **Thiamine (Vitamin B1)** is an essential vitamin that occurs naturally in many foods, and supports and maintains central nervous system function. Supplementing with additional thiamine can support calm behavior and curb everyday stress in pets.
- ▶ **L-Tryptophan** is an essential amino acid that occurs naturally in the body. It can help increase levels of neurotransmitters that regulate mood and promote a calmer state. L-Tryptophan may help improve sleep quality, emotional wellbeing, and daily behavior.
- ▶ **Lemon Balm** is an herb from the mint family that promotes a calm, relaxed mood by supporting normal levels of dopamine in the brain. Lemon Balm also helps promote a healthy digestive system and supports the immune system.
- ▶ **L-Theanine** is an amino acid that may increase levels of dopamine and serotonin in the brain. It can help improve mood, support brain function, promote an alert and relaxed state, and even support cognition. L-Theanine from green tea powder is well-tolerated by most pets.

### Product Facts (Behavior for Dogs & Cats):
