Chicken-liver-flavored chews help strengthen skin and support the gut

This hairball supplement for cats uses antioxidants, minerals, essential fatty acids, and fiber to support skin health and the body's reduction of hairballs. No laxatives, jellies, or oils that lead to further irritation.

ABOUT THE INGREDIENTS:

- ▶ **Omega fatty acids** from safflower oil and flaxseed oil are an important part of healthy cell function and reproduction. Cats need these fatty acids to sustain hydrated skin and normal rates of shedding.
- ▶ **Psyllium** is a good source of fiber that supports digestive function and regularity. It also helps the body to naturally excrete hair, which may help reduce the formation of hairballs.
- ▶ **Zinc** supports skin health and function, and is essential for the production of collagen—one of the main building blocks of skin and hair.
- ▶ **Biotin** helps support skin health and hydration, and is essential for the production of keratin—another main building block of skin and hair.
- ▶ **Cranberry** is rich in antioxidants and vitamins to support immune and urinary tract health along with overall wellness.

Product Facts:

Active Ingredients Per 2 Chews:
