## Heart-shaped treats that are packed with heart-healthy ingredients

These functional taurine treats for dogs are a great addition to specialty and grain-free diets, and are made with no chickpeas, lentils, or legumes. Heart Healthy Treats come in four flavors: Salmon, Cheese, Peanut Butter, and Chicken.

### ABOUT THE INGREDIENTS:

- ▶ **Taurine** is an amino acid, one of the building blocks of proteins. It plays an important role in both heart and brain function in dogs, and maintaining normal amounts of taurine are essential for supporting cardiovascular health. Taurine also supports numerous other functions within the body, including the metabolism of energy.
- ▶ **Salmon oil** is one of the most well-known sources of Omega-3s, including Eicosapentaenoic acid (EPA) and Docosahexaenoic acid (DHA)—two fatty acids that help promote healthy hearts and support the immune system.
- ▶ **Flaxseed** meal has a number of benefits. It offers important vitamins and minerals along with antioxidant properties. The oil in flaxseed meal is also rich in Omega-3 fatty acids, specifically Alpha-linolenic acid (ALA). ALA helps support overall heart and body health.
- ▶ **Kale & spinach**, two leafy greens, are sources of calcium and potassium and offer Vitamins A, C, and K. Leafy greens are a powerful source of nutrients and can support immune and heart health.

### DIRECTIONS FOR USE:

Feed as a treat. Intended for intermittent or supplemental feeding only. Always provide fresh, clean water.

Available in 8.8oz (50 ct) bags.  
Suitable for all ages and weight ranges.
