

Allergy

SUPPLEMENT

With Qrill™ Pet, salmon oil, curcumin, and probiotics

Advanced allergy supplement chew for dogs

A unique allergy supplement for dogs that combines five proven, effective ingredients into one palatable chew. This supplement is rich in Omega essential fatty acids, antioxidants, probiotics, and herbs that work together to support skin & coat health, support a healthy immune system, and help alleviate occasional itching, sneezing, and irritation from allergies. Natural duck flavor.

ABOUT THE INGREDIENTS:

- ▶ Qrill™ Pet krill meal is rich in Omega-3 essential fatty acids that support skin & coat health and can help soothe sensitive skin. It is also a source of astaxanthin—the pigment that gives krill their color is also a potent antioxidant that may help regulate the body's histamine response.
- ▶ Salmon oil is a natural cold-water fish oil that is a major source of Omega-3s, including Eicosapentaenoic acid (EPA) and Docosahexaenoic acid (DHA)—two fatty acids particularly well-suited to support healthy skin & coat.
- ▶ Quercetin is a plant-based antioxidant that helps support the immune system and promotes a healthy inflammatory response. This ingredient may support your animal's overall health during seasonal or environmental allergies.
- ▶ Curcuma longa, more commonly known as Turmeric, is a medicinal herb that's been used for centuries to support health and regulate a healthy inflammatory response, which helps keep skin feeling comfortable and manages common allergy issues.
- ▶ Bacillus coagulans is one of the most widely used and well-known probiotics. Probiotics like Bacillus coagulans not only benefit gut health and comfort but they also promote healthy, smooth skin that's more resilient.

DIRECTIONS FOR USE:

Up to 25 lbs. 1/2 chew daily
25 – 50 lbs 1 chew daily
51 – 100 lbs 2 chews daily
Over 100 lbs 3 chews daily

Available in 8oz (90 ct) jars.
Suitable for all weight ranges.
